

EGU AS Division business meeting, Vienna 2010

Minutes

Around 100 people attended the AS division business meeting.

- There was a strong opinion that room 11 was not adequate. MANY complaints were received from practically all that attended the room. AS will not be pleased with the room next year. AS suffered in the room for five continuous days.
- There was suggestion for a new sub-division on Remote Sensing of Atmosphere. This will have to start with some sessions and later a possibility.
- For YSOPP it is felt that too few receive the award in AS. We usually have more than 50 in evaluation. It is a great task both for students and evaluators. Thus we decided that the top 5% should have the award in case their evaluation score is higher than 8.5 points.
- There was suggested initiative for new journal on atmospheric dynamics. First the relevant articles now in ACP and other should be investigated and if sufficient number, it could be a possibility.
- Within outreach there was suggestion for more on the effect of atmosphere on heritage culture.
