Annales Geophysicae (ANGEO)

IF 1.842

Annales Geophysicae (ANGEO) is an international, multi- and inter- disciplinary scientific journal for the publication of original articles and of short communications (Letters) for the sciences of the Sun-Earth system, including the science of Space Weather, the Solar-Terrestrial plasma physics, and the Earth's atmosphere.

- [Homepage](#)

- [Editorial Board](#)

Atmospheric Chemistry and Physics (ACP) & Discussions (ACPD)

IF 5.520

Atmospheric Chemistry and Physics (ACP) is an international scientific journal dedicated to the publication and public discussion of high quality studies investigating the Earth's atmosphere and the underlying chemical and physical processes. It covers the altitude range from the land and ocean surface up to the turbopause, including the troposphere, stratosphere and mesosphere.

Atmospheric Measurement Techniques (AMT) & Discussions (AMTD)

IF 3.335

Atmospheric Measurement Techniques (AMT) is an international scientific journal dedicated to the publication and discussion of advances in remote sensing, in-situ and laboratory measurement techniques for the constituents and properties of the Earth's atmosphere.

Biogeosciences (BG) & Discussions (BGD)

IF 3.859

Biogeosciences (BG) is an international scientific journal dedicated to the publication and discussion of research articles, short communications and review papers on all aspects of the interactions between the biological, chemical and physical processes in terrestrial or extraterrestrial life with the geosphere, hydrosphere and atmosphere. The objective of the journal is to cut across the boundaries of established sciences and achieve an interdisciplinary view of these interactions. Experimental, conceptual and modelling approaches are welcome.

GeoLog

GeoLog is EGU's official blog. It regularly brings readers information about the Union and its activities, particularly its General Assembly. Guest and opinion posts written by external contributors also have a place on the blog.

GEOLOG

Regular features:

- Imaggeo on Mondays – a weekly highlight of a picture from EGU's open-access image repository, Imaggeo
- Geosciences column – featuring recent research in the Earth, planetary and space sciences
- Geotalk – a short Q&A with a geoscientist

EGU Blog Network

The EGU Blog Network complements our official blog, featuring a diverse community of Geoscience bloggers:

Green Tea and Velociraptors
by Jon Tennant

Geology for Global Development
by Joel Gill

GeoSphere
by Matt Herod

The network aims to share accurate information about geoscientific research, in a language understandable not only to fellow scientists but also to the broader public. With a particular focus on European research, the network offers a place for scientists to interact with each other and the Union.

Social Media Presence

Activity on EGU's social media channels, particularly Facebook and Twitter, increases greatly at the General Assembly and in the months preceding the conference. This is the time when we share updates about the sessions and activities in Vienna - you can follow this activity using this year's hashtag, #equ2013.

You can find us on:

Imaggeo

Imaggeo, is the online open-access geosciences image repository of the European Geosciences Union. Every geoscientist who is an amateur photographer (but also other people) can submit their images to this repository. Being open access, it can be used by scientists for their presentations or publications as well as by the press. If you submit your images to imaggeo, you retain full rights of use, since they are licenced and distributed by EGU under a Creative Commons licence.

Associated to Imaggeo, the EGU organizes an annual photo competition and related exhibit at its General Assembly. Every conference participant can submit up to three photos on any broad theme related to the Earth, space and planetary sciences. Submitted entries are automatically made available to all from imaggeo. A panel of judges chooses between eight and fifteen finalist photographs for exhibition at the General Assembly, where each participant can vote on their favourite photos. The three winners receive a free registration to the following General Assembly.

EGU TV

Long-duration EGU videos, which you can also find on the Union's [YouTube](#) page, are posted here on EGU TV. This page includes web streaming of lectures and press conferences at the General Assembly and clips from the Geosciences Information For Teachers (GIFT) workshop. On the General Assembly web streaming pages, you'll find the titles of each streamed talk and, from 2011 onwards, links to the abstract or session each clip refers to, if applicable.

General Assembly Web Streaming

Selected sessions as well as all press conferences during the EGU General Assemblies will be live-streamed and are also available after the conference.

Communication Activities at the Assembly

EGU Today

- EGU Today is a daily newsletter highlighting interesting workshops, lectures and films at GeoCinema, amongst activities at the Assembly
- Paper copies will be distributed daily and available to download

Blogs

- GeoLog & the EGU Blog Network will be sharing great sessions, research, interviews and more throughout the Assembly
- Follow them here: geolog.egu.eu and blogs.egu.eu

Social Media

- Sessions will be advertised on Twitter ([@EuroGeosciences](https://twitter.com/EuroGeosciences)) and Facebook (**European Geosciences Union**)
- Participants can ask questions & keep updated by following [#egu2013](https://twitter.com/egu2013)

2. Lamarck Medal

- a. **Award Committee: 3 members plus chairman**
- b. **Nominations to be submitted online to Executive Office**
- c. **No self-nominations**
- d. **Deadline: 15 June 2013!**
- e. **2014: nominations for PALAEONTOLOGY**

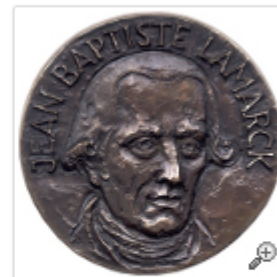

Awards & Medals

Jean Baptiste Lamarck Medal

The Jean Baptiste Lamarck Medal is established by the Division on Stratigraphy, Sedimentology and Paleontology in recognition of the scientific achievement of Jean Baptiste Lamarck.

It is reserved for scientists for their exceptional contributions to either Stratigraphy, Sedimentology or Paleontology. The medal will be awarded each year, alternating between the three subdivisions, so that each third year a Stratigrapher, Sedimentologist or Paleontologist will be awarded.

The medal has been exclusively designed for the EGU by József Kótai.
