

This section advertises conferences, summer schools and workshops submitted to the EGU online [meetings calendar](#). Meetings co-sponsored by the Union are highlighted with an EGU logo.

9th TOPO–EUROPE Workshop: Linking the Deep and Surface Earth

09–11 October 2013, Certosa di Pontignano, Italy

TOPO–EUROPE conferences have been held annually since 2005. This will be a three-day workshop on topics that link deep Earth tectonics with surface processes. The conference will be multidisciplinary including participants from geodynamics, tectonics, seismology, sedimentology and geomorphology. Attendance is open (subject to space limitations) and submissions are welcome on all topics relative to the cause, creation and modification of the Earth's topography.

VII EGFA – VII Meeting on Physical Geography and Environment: Great forest fires, erosion, degradation and rehabilitation

10–11 October 2013, Guimarães, Portugal

The main objective of VII EGFA is to stimulate a broad debate on the state of knowledge of large forest fires in Portugal and its effects at ground level, but also to spread some of the work done in recent years in Portugal, on this vast and current theme.

5th EGU Leonardo Conference on Facets of Uncertainty

17–19 October 2013, Kos Island, Greece

Three different series of events, the EGU Leonardo Conference, held every year in Europe, the IAHS Statistical Hydrology (STAHY) Workshop, held every year in different parts of the world, and the Hydrofractals Conference, held every ten years, coincide in space and time: Kos Island, Greece, 17–19 October 2013. Each of these events has its own dynamics but all three have been set to focus on a common idea: the uncertainty in natural processes.

Fighting Global Poverty: Can Geologists Help? – GfGD National Conference

23 October 2013, London, UK

This Geology for Global Development (GfGD) event will bring students and recent graduates with an interest in international development, together with a series of professionals from across the sector. The conference will explore if and how geologists can contribute to the fight against global poverty, giving a 'big picture' overview of the opportunities and careers available. The conference will also explore the skills young geologists will need to develop in order to contribute to development in an effective and sustainable manner.

19th Windy Day Meeting 2013

23 October 2013, Southampton, UK

This informal meeting of the UK aeolian research community, will be of interest to any scientist undertaking research relating to drylands, deserts, coastal dunefields, playas and processes therein. Presentations covering the application of basic physics, methodological issues and techniques to these environments are also welcome, and presentations by research students are especially encouraged.

International Conference on Regional Climate

04–07 November 2013, Brussels, Belgium

CORDEX 2013 brings together the international community of regional climate scientists to present and discuss results from WCRP regional climate studies, with a particular emphasis on the CORDEX initiative. The first day of the meeting will feature the IPCC and a high-level session with the participation of European Commissioners.

10th European Space Weather Week

18–22 November 2013, Antwerp, Belgium

Now in its 10th year, the European Space Weather Week has grown into the main annual event in the European Space Weather calendar. The event this year will highlight key innovations in space weather research, applications and services. The agenda will be composed of plenary/parallel conference sessions, working splinter meetings and dedicated events for service end-users.

European Research Course on Atmospheres

07 January – 08 February 2014, Grenoble, France

ERCA is a course for thesis students, scientists and engineers from universities, public research institutes and private research or industrial organisations. It is an interdisciplinary course on the Physics and Chemistry of the Earth's atmosphere, the climate system and climate change, atmospheric pollution at different scales and the human dimensions of environmental changes. The course also covers other planets, satellites and space weather, amongst others.
